A Toolkit for Secret Security Patch Identification and Fixes

PI & CoPIs

USDA/NASS Online Geospatial Applications CropScape and VegScape Systems

Funding source:

Albany, GA

Deadline:

March 25, 2021

Secondary data analysis using existing data sets from vision-related clinical trials, such data are of the highest programmatic interest. The purpose of this FOA is for secondary data analyses utilizing existing database resources. Applications are encouraged to include plans for secondary data analyses utilizing existing database resources.

This FOA encourages applications from institutions/organizations that propose to conduct theoretical and applied research in the general area of Mathematical and Scientific Foundations of and Economic Sciences (SBE) will jointly sponsor new research collaborations consisting of computer science and engineering, and social/behavioral sciences. Application domains applying to this program element, although they may be.

The Designing Accountable Software Systems (DASS) program solicits foundational research in the foundations of software and for designing, implementing, and validating accountable software systems. This program element will fund projects that advance the understanding and application of new and existing conceptual frameworks, methods and tools for the research domains within software and related systems. The program seeks to advance the understanding and application of new and existing conceptual frameworks, methods and tools for the research domains within software and related systems.

The Transportation Research Board's National Cooperative Highway Research Program (NCHRP) Designing Accountable Software Systems (DASS) program solicits foundational research in the foundations of software and for designing, implementing, and validating accountable software systems. This program element will fund projects that advance the understanding and application of new and existing conceptual frameworks, methods and tools for the research domains within software and related systems. The program seeks to advance the understanding and application of new and existing conceptual frameworks, methods and tools for the research domains within software and related systems.

The Role of Cybersecurity in the Spread of Disinformation and Misinformation

Commonwealth Cyber Initiative (CCI) aims to create a Commonwealth-wide ecosystem of cybersecurity and related activities.

Dear Colleague Letter: Pilot Projects to Integrate Existing Data Sets to Advance the Understanding and Application of New and Existing Conceptual Frameworks, Methods and Tools for the Research Domains Within Software and Related Systems

The Commonwealth Cyber Initiative (CCI) aims to create a Commonwealth-wide ecosystem of cybersecurity and related activities.

The IDIA faculty directory is a tool to find others with complementary expertise and a mutual interest to collaborate on research projects. The directory can be used to locate faculty members who have a shared interest in the following areas:

- Data mining
- Machine learning
- Artificial intelligence
- Data science

Candidates must be enrolled in a full-time PhD program at an accredited U.S. university and a U.S. citizen or permanent resident by the time of the application.
