Dear Colleagues,

We are pleased to announce several upcoming events, opportunities, and news items that may interest you.

**Upcoming Events**

- **AI Innovation Symposium**
  - Date: February 10, 2023
  - Details: More information is available here.

**Student Opportunities**

- **EnergyTech University Prize** from the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE)
  - Eligibility: Students interested in learning about cutting-edge clean energy tech.
  - Application Deadline: March 29, 2023
  - More information is available here.

- **DHS S&T Announces New Student Research Internship**
  - Deadline: January 5, 2023
  - Details: More information is available here.

**Various Opportunities**

- **2023 Homeland Security Professional Opportunities for the Student Workforce to Experience Research (HS-Prep)**
  - Application Deadline: March 27, 2023
  - More information is available here.

- **RISC 2023 Internship**
  - Application Site Now Open
  - More information is available here.

**Funding Opportunities**

- **CyberTraining and SCIPE Solicitation Webinar**
  - Date: December 9, 2022 (10-11 am)
  - More information is available here.

- **RESPECT 2023: Call for Contributions**
  - More information is available here.

**Dear Colleagues,**

The National Geospatial-Intelligence Agency (NGA), in affiliation with the George Mason University (GMU) Center for Information and Cybersecurity, encourages you to consider submitting your affiliation with the institute. Participation in the Institute for Digital Infrastructure and Applications (IDIA) does not prevent your profile from being associated with other university centers. There is no financial burden to you or your departments for affiliation with the institute.

We invite interdisciplinary contributions from computer science education, educational leadership and administration, policy, and community and social research. Recognizing the important role that educators, students, policy-makers, and community leaders play in shaping the next generation of cybersecurity professionals, we offer a variety of resources to diversify the DHS workforce.

Did you know that, as an IDIA faculty affiliate, you are eligible to:

- **Submit your profile on the IDIA Faculty Network site**
  - More information is available here.

You can view information about the National Geospatial-Intelligence Agency’s operational missions to include crisis support. The purpose of this Request for Information is to probe the current state of technology and capability related to these missions, with a view towards identifying gaps, requirements, and potential solutions.

Questions? Contact Mike Bunting at mbuntin@gmu.edu.

The Department of Homeland Security (DHS) announced the availability of new student research internships through the EnergyTech University Prize (EnergyTech UP) from the Office of University Programs (OUP). Students interested in learning about cutting-edge clean energy technologies are invited to apply.

EnergyTech UP is a competition for graduate and undergraduate students across the United States and territories to participate in the American-Made Solutions Prize Challenges program, asks multidisciplinary student teams to identify a high-potential energy technology, assess its market potential, and propose a strategy for commercialization—and compete for a share of $370,000! The EnergyTech University Prize is part of the American-Made Solutions Prize Innovation Initiative (AMSPI), a part of the American-Made Solutions Prize (AMSP), the Office of Energy Efficiency and Renewable Energy (EERE), and the DOE Office of Science (DOE-OS).

The EnergyTech University Prize (EnergyTech UP) from the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE) is now accepting applications! This innovative prize, part of the American-Made Solutions Prize Innovation Initiative (AMSPI), is open to student teams from across the United States and territories. Teams will compete for a share of $370,000 to help commercialize high-potential energy technologies.

Students interested in learning about cutting-edge clean energy tech, take note: The next round of EnergyTech University Prize (EnergyTech UP) from the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE) is now accepting applications! This innovative prize, part of the American-Made Solutions Prize Innovation Initiative (AMSPI), is open to student teams from across the United States and territories. Teams will compete for a share of $370,000 to help commercialize high-potential energy technologies.

Register for Q&A sessions to receive more information and learn how to apply. These Q&A sessions will be held remotely via Zoom on December 9, 2022 (10-11 am) and December 14, 2022 (2:00 pm EST). More information is available here.

The office hours for our recently launched CyberTraining and SCIPE Solicitation Webinar are approaching soon. More information is available here.

Thank you for your continued support and involvement in the institute.

Best regards,

[Your Name]
