Dear Colleagues,

This email was sent to you because the University of Virginia is planning to launch a new initiative that will include many of the aspects that you are working on.

The University of Virginia is committed to broadening participation by historically excluded communities. In support of this goal, the University is excited to announce a new funding opportunity under ROSES-2022, F.15 High Priority Open-Source Science.

NASA's Open-Source Science Initiative (OSSI) is pleased to announce a new focus area to support the goals of NASA's Transform to Open Science (TOPS) initiative, such as promoting open access, open sharing, and open collaboration. The initiative is focused on making science more accessible, inclusive, and reproducible.

There is no financial burden to you or your departments for affiliation with the institute. Participation in IDIA is open to researchers from all fields and departments. As an IDIA faculty affiliate, you are eligible to:

- Receive support for IDIA-relevant events
- Attend and connect with potential partners
- Have your work featured in a national media campaign
- Pitch your technology solution, showcase at AI Innovation Symposium, and apply for funding
- Network with innovators in the transportation, entertainment, national security, and social justice sectors
- Become part of the dynamic multidisciplinary faculty network
- Receive support for the creation of a market-tested prototype or technology transition
- Enhance the role of NSF's Solar Facilities Data in Multi-Messenger Heliophysics

In addition to these core criteria, we welcome proposals that would support the goals of NASA's Transform to Open Science (TOPS) initiative, such as promoting open access, open sharing, and open collaboration. The initiative is focused on making science more accessible, inclusive, and reproducible.

Congratulations to:

- Hart, David M.
- NSF I-Corps Hub (Track 1): Mid-South Region
- NSF I-Corps Hub (Track 1): Mountain Lake Region

Announcement: The Q&A session is for our recently launched IDIA P3 Faculty Fellows Program. For the Q&A session, send your questions to IDIA-Programs@virginia.edu. The session will be held on Zoom on February 10, 2023 (10-11 am) and will include networking opportunities.

More information is available here.

March 29, 2023

With sincere regards,
